**3** Read the excerpts about a special date and answer the questions in your notebook.

**Excerpt 1**

On World Environment Day on June 5, there's a lot of buzz regarding curbing plastic pollution, but what most people don't realise is that their unhealthy, personal choices are responsible for the degrading environment. [...] So [...] here are some simple alternatives you can choose from to beat plastic pollution. Start today, be a responsible global citizen because it's easier than you think!

**Say no to paper and thermocol cups:** Do you rely on coffee on the go? Well, it's time you make some necessary changes. Opt for [...] travel mugs as paper cups and glasses add a lot to pollution and are non-biodegradable. It is believed that plastic cutlery takes around 100-1000 years to decompose.

Original text: Opt for [...] travel mugs as paper cups and glasses add a lot to pollution and is [sic] non-biodegradable.

**Excerpt 2**

**World Environment Day 2018: 10 things you [...] were doing that harm the environment**

**Using plastic bags**

"Avoiding the usage of plastic in any forms" is one of the basic and important changes we need to adapt to. Plastic in any form is hazardous as it doesn't decay. [...] They [plastic bags and bottles] don't biodegrade and no one knows how long it takes until they're completely gone.

**Excerpt 3**

**What Do People Do?**

World Environment Day is celebrated in many ways in countries such as Kenya, New Zealand, Poland, Spain and the United States. Activities include street rallies and parades, as well as concerts, tree planting, and clean-up campaigns. In many countries, this annual event is used to enhance political attention and action towards improving the environment. This observance also provides an opportunity to sign or ratify international environmental conventions. [...]

**Background**

World Environment Day was established by the United Nations General Assembly in 1972 [...].
