Gemini Zodiac Sign

Air sign; ruled by Mercury

Cerebral, chatty, loves learning and education, **charming**, and **adventurous**. The Gemini symbol is that of a pair of twins. This is because this sign rarely likes to do anything alone. Gemini are never happier than when they are sharing ideas and concepts with someone else. **Communication** is a key element for this sign, so many of this sign go into occupations that include some communication in some large capacity. **Curiosity** is a key characteristic of this sign, and they are people persons. Gemini are great at parties because they can find almost anything to talk about with anyone. Gemini are adventurous by nature and so engage in traveling as often as they can as it affords them the opportunity to meet new people, experience new ideas, and to learn new concepts.
