"Teachers will allow us to speak out our minds"
Chrisanne D'Souza

My dream school would be fun and interesting. There would be various types of activities for all kids. The lesson periods would contain fun learning and less writing. The playground will be extraordinary, with swings, slides, and even fountains! During recess, we would go to the cafeteria where different types of snacks would be served. The uniforms will be colourful and we will be allowed to wear party clothes once a week - or have costume days. The teachers should allow us to speak out our minds. School bags should contain very few books, which will be easy to carry. There should also be a classroom for pets, where kids can interact with animals.

"My school will focus on two things: coding and sports" Pranav Ramanathan

My dream school would be located in the hills where the climate would be very cold. [...] There will be over 10 subjects from grade V - ITC, Math, English, Javascript, C and AI. The school will focus only on two things: coding and sports. There will be different kinds of sports such as American football, soccer, rugby, basketball, cricket, tennis, baseball, swimming, water polo, polo, athletics, kho-kho and kabaddi. [...]
